

10 operadoras com maiores despesas em "EVENTOS/ SINISTROS CONHECIDOS" no último trimestre.

The screenshot displays a database management interface. On the left, a 'SCHEMAS' pane shows a tree view with 'ans_dados' expanded, containing 'Tables' (dados_cadastrais, demonstracoes_contabeis), 'Views', 'Stored Procedures', 'Functions', 'phpmyadmin', and 'test'. The main area shows a SQL query in 'Query 1':

```
1 • SELECT REG_ANS, SUM(VL_SALDO_FINAL) AS total_despesas
2 FROM demonstracoes_contabeis
3 WHERE DESCRICAO LIKE '%SINISTROS CONHECIDOS%'
4 AND DATA BETWEEN '2024-07-01' AND '2024-10-01'
5 GROUP BY REG_ANS
6 ORDER BY total_despesas DESC
7 LIMIT 10;
```

Below the query, the 'Result Grid' shows the results of the query. The columns are 'REG_ANS' and 'total_despesas'. The results are listed in descending order of total expenses.

REG_ANS	total_despesas
5711	163374567343.00
6246	111204288243.00
326305	110142728602.00
359017	49779554907.00
368253	41527985305.00
346659	39006648134.00
339679	36583808056.00
302147	31064904226.00
343889	27982229896.00
701	25116161157.00

At the bottom, there are tabs for 'Administration' and 'Schemas', and a message 'No object selected'.

10 operadoras com maiores despesas nessa categoria no último ano.

```
1 • SELECT REG_ANS, SUM(VL_SALDO_FINAL) AS total_despesas
2 FROM demonstracoes_contabeis
3 WHERE DESCRICAO LIKE '%SINISTROS CONHECIDOS%'
4 AND DATA BETWEEN DATE_SUB((SELECT MAX(DATA) FROM demonstracoes_contabeis), INTERVAL 12 MONTH)
5 AND (SELECT MAX(DATA) FROM demonstracoes_contabeis)
6 GROUP BY REG_ANS
7 ORDER BY total_despesas DESC
8 LIMIT 10;
9
10
```
